...AND MORE!

The previous owner had begun a renovation of the interior by stripping out the aft bedroom and removing the fabric on the ceiling. There are some missing cabinet doors as well. The interior does need some updating.

Though I spent almost \$25,000 to make this GMC roadworthy, we are preparing to move from CA to WA state and have run out of time to work on her. We've done all of the hard work for you, all you need to do is add your own special touches and colors to the interior. Please call or email with any questions.
